

GOVERNMENT OF THE DISTRICT OF COLUMBIA
Department of Energy and Environment

Site Plan Requirements

When submitting a site plan to the wells permitting module of the Surface and Groundwater System (SGS), the site plan must include the following:

1. Lot;
2. Square;
3. Geographical location of the well within the property boundaries;
4. Geographical location of the well in relation to the nearest street intersection;
5. Setback distances from property lines;
6. Setback distances from recognized environmental conditions identified on the property where the well is sited;
7. Identification of public spaces;
8. Identification of structures and driveways;
9. Extents of the land disturbing activities including any construction entrance and stockpile area(s);
10. Identification of waters of the District of Columbia on or adjacent to the property where the well will be sited;
11. Compass directions;
12. Scale bar; and
13. A key or legend
